

# 7 Ways to Use Your Esser II Funds

## Cybersecurity

District's networks must be secure to ensure the availability and uninterrupted remote learning and to protect the confidentiality of personal student and employee data in compliance with data privacy laws.

## Technology Coaching

Instructional coaching helps teachers learn new technologies, adapt lesson plans to better integrate technology, and help teachers remain flexible in their teaching modalities if a long-term closure happens.

## Classroom A/V

The equipment they need to conduct classes in remote, hybrid, or in-person. Many classroom A/V technologies give the students the best learning experience in class or over video-conferencing.

## Online Professional Learning

Training found in these microcredentials can help teachers plan for a long-term closure. Each badge provides teachers with a variety of resources to help them learn digital tools and strategies.

## Remote Services

Purchasing a technology service to oversee the day-to-day operations & overall nature of Remote Services can help keep the Technology Department stable & in a good position thru any closure.

## Managed Services

Managed Services allows our team of infrastructure experts to monitor, detect, and remediate issues that arise within your environment. This increases the capacity of your in-house technology staff.

## Technology Devices

Technology Devices are vital for learning in a distanced environment. Providing teachers and students with the hardware that they need in order to succeed if there is another long-term closure.
