

Cybersecurity Checklist

Daily

- Don't reuse passwords for old & new accounts
- Use MFA tools daily
- Don't save login information to browsers or devices
- Lock your device when not in use

Weekly

- Restart your device weekly
- Uninstall apps and software no longer used
- Check account activity to ensure you aren't signed into other devices or unknown devices

Monthly

- Check and install any new updates
- Evaluate who has/needs access to shared files
- Inspect home WiFi network for unknown devices
- Restart your WiFi network at home once a month
