# 5 gen AI features on Chromebook Plus that every educator should try

Supercharge your work with Chromebook Plus – powerful enough for advanced workflows with Google AI built in.

Discover these built-in generative AI features on Chromebook Plus so you can save time, differentiate learning experiences, and better connect with your school community.
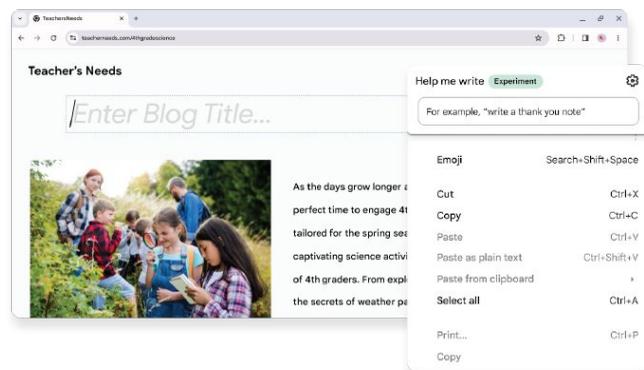

01

Help me read

Get the gist of text quickly by generating a summary of any website, PDF, or app. Just open the **Help me read** feature to understand the main idea of long articles, how-to guides, emails, and more – in just minutes. Even ask it follow-up questions.
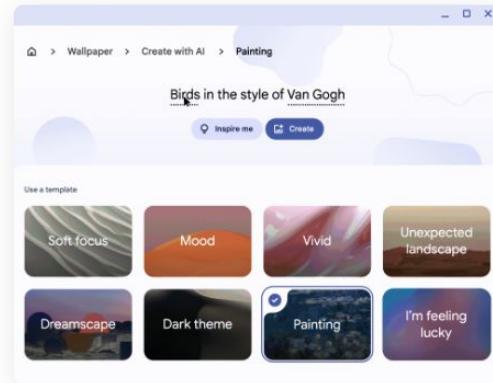

Help me write

Add some wit to your words when drafting lesson instructions, student feedback, and more with a built-in writing assistant for any website or app on ChromeOS. With just a right click and a quick prompt, **Help me write** helps you find the right words in your preferred voice and tone.

Generative backgrounds

Capture students' attention by generating your own images for new subjects you're teaching with **generative backgrounds** built into your Chromebook. Use your new image in your Google Classroom or for your laptop background. You can even further customize your image by adding new objects.

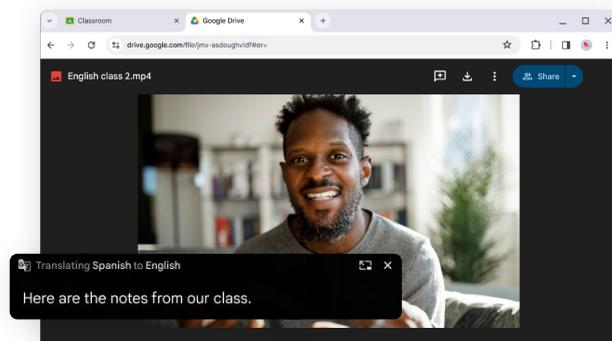

03

04

GIF recording

Engage students in a fresh way by generating custom GIFs. Give your students kudos and encouragement by creating stickers to put on their work with the **GIF recording.** Or you can save screen recordings in GIF format to make your own homemade demos.

Live translate

Break down language barriers and open up a new world of content with **Live translate** on any app or browser on Chromebook Plus. Instantly display AI-translated captions on videos, or use this feature to interpret your conversations with students and guardians as you're speaking with them in person.
