

Transform how you teach, learn, and work with Gemini for Education

Empower everyone in your education community with Gemini, your AI assistant for education. Save time, create captivating learning experiences, inspire fresh ideas, and learn confidently—all in a private and secure environment.

Top ways your education community can use Gemini for Education

Educators

- Draft lesson plans aligned to learning objectives and education standards.
- Re-level texts and assignments and increase student engagement by adjusting content to fit their interests.
- Generate assessments, assignments, and rubrics from scratch or use previous examples with corresponding answer keys.

Students

- Deepen understanding with on-demand support, like explanations of challenging concepts and step-by-step guidance.
- Prepare for exams by creating personalized practice quizzes based on hard-to-grasp concepts.
- Brainstorm and research ideas, get feedback on writing, and generate citations.

Education leaders

- Go from a blank page to a grant proposal, alumni outreach template, newsletter, recommendation letter, or email to a parent.
- Summarize long documents, analyze data, and create templates for budget proposals, permission slips, and more.
- Brainstorm new initiatives, develop project plans, and draft talking points for presentations.

The Google advantage

Industry leading models, free of charge

Gemini for Education and NotebookLM are completely free of charge and are powered industry leading models like Gemini 3 and Nano Banana Pro, which are consistently topping third party rankings.¹

Grounded in learning science

Gemini is infused with [LearnLM](#), our family of models fine-tuned for learning and built in partnership with education experts. This ensures Gemini is more helpful for teaching and learning.

Best-in-class data protection

Gemini and [NotebookLM](#) are Core Services covered under your Workspace for Education terms and supports compliance with many industry regulations, like COPPA and FERPA. Your chats are not reviewed by humans or used to improve generative AI models.

Integrated with your products and data

Gemini is integrated with products you already know and love, like Google Search, Docs and Classroom, so it can reference your content to provide more helpful responses. Additionally Gemini LTI integrated directly in Canvas, Schoology and soon Moodle.

Industry pioneer in AI

The work underpinning generative AI comes from Google's [invention of the Transformer in 2017](#). And AI has powered Google products for nearly a decade—from autocomplete suggestions to malware detection in Gmail.

The only full-stack AI solution

Google provides the cloud infrastructure, hardware devices, and AI models and the software they power enabling end-to-end privacy and security, reliability, and rapid innovation.
